

FFF-CARBON CHARTER

VISION

The FFF Carbon is an impartial, independent non-profit organisation which serves the techno-intellectual needs of the multidisciplinary fossil fuel and energy community through communication, information distribution, coordination, education, promotion, and networking.

STRATEGIC STATEMENTS

- Energy is key to social and economic development.
- Fossil fuels will remain a core component in a mixed energy supply, supporting the transition to a low-carbon economy.
- The development of the non-electricity fossil fuel-based industries will extend coal, oil, and gas utilisation opportunities.

The Role FFF-Carbon

- To provide a source of impartial information on fossil fuels, including all forms of coal, carbon, oil and gas, and including alternative and renewable energy sources insofar as they impact on the use of fossil fuels as a source of energy for the country.
- To be the first point of reference on fossil fuels, their production, use, and environmental impacts, based on sound research, practical experience, and ethical commitment to the provisions of advice and guidance.

The FFF-Carbon

- Is financially independent, and sustains its revenue from, donations, membership fees, sponsorships, conferences, workshops, seminars, webinars, funded research, courses, and projects.
- It is impartial and rational, providing balanced views which reflect that stance.
- May also provide specific well-informed views and/or statements drawn from specialists amongst its network which may not necessarily be those of the FFF-Carbon.

The FFF-Carbon is an association comprised of

- Directors and an Executive Committee, supported by a Management team;
- Specialist Committees in specific disciplines, topics, or themes;
- Individual members, corporate members, and observers from associate organisations, all of which provides the necessary inclusivity.

The FFF-Carbon collaborates, engages, and partners with

Government; local, regional and international organisations; the full spectrum of scientific, technical, engineering and techno-economic communities engaged in energy; and research and secondary and tertiary educational institutions.

The FFF-Carbon provides

- information, communication, and education via techno-transfer through conferences, courses, colloquia, seminars, workshops, webinars;
- networking, mentoring, and guidance along the fossil fuel value-chains, and related energy industries;
- specific services or data drawn from specialists in key topics or disciplines for the purpose of developing media and journal articles, conferences, lectures, webinars, and courses;
- coordination of projects of national concern and lobbying by accredited specialists.

Itumeleng Kgomo, Chairman of the Board
