

Dear Colleagues,

21 August 2023

**The FFF as FFF-Carbon is back!**

After a break due to the global pandemic, the Fossil Fuel Foundation is back - this time in the evolved form of the FFF-Carbon.

The FFF-C understands the need for the continued use of coal (and other pertinent fossil fuels) for energy generation, in a more modern, valid, credible, and responsible manner. The intention is to expand an informed and active community in support of the fossil fuels and carbon-related communities and the technical issues and policies surrounding them.

The Directors and ExCo are initiating new events and will provide additional services to FFF-C members and the community at large. Membership is welcomed from industry, academia, student bodies, scientific and technical SOEs, and government.

We wish to invite you to join the FFF-C and to participate in activities to ensure an informed, responsible, and sustainable community.

In this regard, please find the attached FFF-Carbon Charter, a list of Membership Benefits, and the Membership Form. Kindly return the Membership Form to [angelique@fffcarbon.co.za](mailto:angelique@fffcarbon.co.za).

We look forward to warmly welcoming you and your organisation as a Member of the FFF-C, and to your participation in this endeavour as well as your presence at forthcoming events.

Yours sincerely

FFF-C Chair

**VISION:** The FFF Carbon (FFF-C) is an impartial, independent non-profit organisation which serves the technological needs of the multidisciplinary fossil fuel and energy community in Africa through communication, information distribution, coordination, education, promotion, and networking.
