

FFF Carbon

Energy and high-tech materials of the future

ONLINE WEBINAR

Dale McLean / CEO River Energy

13 March 2024 1pm-2pm

Implementing discard coal rehabilitation & cleaner coal solutions towards zero waste coal processing supporting a just transition.

Talk Summary:

Our operations show that it is possible to operate circuits and align capabilities, processes and technologies for the enhancement of yield from every ton of coal processed by minimizing and recovering waste and discard through integrated coarse to ultra-fine waste coal to energy solutions.

Speaker Biography:

Dale is CEO of River Energy, a group specializing in energy from waste with a focus on rehabilitation and processing of discard coal resources. River Energy currently runs a 600 tph coarse coal handling and preparation plant including ultra-fine coal slurry beneficiation plant and binderless coal briquetting.
